Introducing the Part Part Whole Model

Here is a part part whole model

We can put information in to part part whole models.

Example:

There are 3 triangles.
There is 1 square.
There are 4 shapes altogether.

Section A For each set of shapes, complete a part part whole model using numbers.

Section B What's the whole? Complete the part part whole models.

Section C There are 10 counters.
Can you make 5 different part part whole models when the whole is 10?
